

# Samyukta Kisan Morcha

**50th Day, 13 January 2021**

It has been 50 days since farmers protest at Delhi borders is going on. Opposition to the three farm laws brought by the central government is becoming nationwide. Farmers are strict on their demand for repealing all the three laws and legal right of the MSP. Despite many efforts of the government and anti-social elements, we want to tell that without these demands the farmers will not withdraw their strike.

The festival of Lohri is being celebrated by burning the copies of three farm laws, at all the borders of Delhi and the protest site across the world. All the farmers' leaders on the Singhu border participated in this program and challenged this government by remembering Dulla Bhatti.

Police personals are constantly harassing farmers on the Jaipur Delhi Highway. It is the fundamental right of the farmers to demonstrate peacefully for their right cause. The Samyukta Kisan Morcha appeals to the police for cooperating with the farmers on the arrangements.

During the Supreme Court hearing, it was said "Why are women in this strike? Why are women and elders "kept" in this strike? They should be asked to go home". The Samyukta Kisan Morcha condemns such statements. The contribution of women in agriculture is incomparable and this movement is also a movement of women. It is shameful that women's agency is being questioned. We strongly condemn this.

Farmers are protesting at many places of Madhya Pradesh including Bhind and Guna. Farmers are also demonstrating in Maharashtra, Odisha, Chhattisgarh, Andhra Pradesh, Rajasthan and Karnataka. The farmers of Bihar, which have already faced the results of the open market in the agriculture sector, have been protesting against these laws since the beginning.

This signifies the insensitivity of the government that farmers are dying on the borders of Delhi and the other sites of protests in the country. The government's disregard for this undoubtedly exposes their inhuman faces. Also, the news of the martyred farmers of all the protest sites is not reaching at the national and international platforms. Some dedicated volunteers of this movement compiled the facts and all the pieces of information. Sadly this figure has reached 120. These are not just the numbers. The separation of all these lives from us is undoubtedly a big loss to all of us, but the government is still so insensitive that it is not taking up this issue seriously.

Details of those who died in this movement are available at this link which will be updated every day.
